

## Verizon Life Span Literacy Matrix: Children's Early Literacy Measures

**Test — Expressive One-Word Picture Vocabulary Test – 2000 Edition (EOWPVT (2000))**

**Author —** Academic Therapy Publication. (2000). Novato, CA: author.

**Purpose —** The EOWPVT (2000) measures a child's verbal expression of language by asking the child to make word-picture associations.

**Population —** The EOWPVT (2000) is used with children ages 2 through 18.11 years.

**Time —** The EOWPVT (2000) can be administered in 10 – 15 minutes.

### **Description**

The EOWPVT (2000) is an individually administered norm-referenced test. It provides an assessment of a student's speaking vocabulary that can be accessed and retrieved from memory and used to produce meaningful speech. It requires individuals to name objects, actions, and concepts pictured in illustrations.

### **Benefits**

In addition to providing information about how a child processes language, the test provides information about speech defects, learning disorders, auditory processing, English fluency of a bilingual child, and auditory-visual-verbal association ability.

### **Validity/Reliability**

Includes national norms based on a representative sample of more than 2,000 individuals residing in the United States.

### **Cost**

Test Kit: \$145.00

### **Source**

This document is a summary of information found on the publisher's Web site.
